About US

Bluedrop – Solar & Irrigation

is a Zimbabwean company specializing in solar energy, borehole drilling, and water infrastructure solutions. We provide reliable and sustainable systems for homes, businesses, farms, institutions, and communities, helping clients overcome power and water challenges through practical, high-quality solutions tailored to local needs.

Our Values

Integrity

We believe in honesty, transparency, and accountability in every engagement.

Professionalism

We uphold high standards in communication, workmanship, project execution, and customer support.

Sustainability

We prioritize environmentally responsible and long-term solutions that create lasting value.

Innovation

We continuously seek practical and efficient ways to solve water infrastructure and energy challenges.

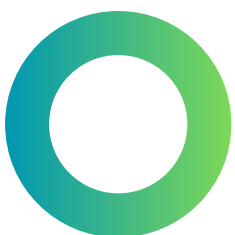

Mission

To provide reliable, sustainable, and cost-effective solar and water infrastructure solutions that improve everyday life, support productivity, and empower communities and businesses across Zimbabwe.

Vision

To become one of Zimbabwe's most trusted and innovative providers of renewable energy and water infrastructure solutions, delivering systems that contribute to long-term national development and sustainability.

Solar Energy Solutions

Solar Power Systems (1kVA – 15kVA+)

We supply and install customized solar energy systems for homes and businesses, reducing electricity costs and ensuring uninterrupted power supply.

Solar System Maintenance & Repairs

Routine servicing, fault diagnosis, and repairs for solar systems to ensure optimal performance and longevity.

Solar Water Pumping Systems

We design and install solar-powered pumping systems that provide a sustainable solution for water abstraction without reliance on grid electricity.

Solar Power Consultations & Load Assessments

We provide professional solar power consultations and load assessments to help clients choose the most suitable and cost-effective solar system for their specific energy needs.

Borehole & Water Solutions

Borehole Survey & Site Assessment

We conduct professional hydrogeological surveys to identify optimal drilling locations, ensuring high water yield and long-term reliability.

Borehole Drilling & Casing

Our team provides efficient and precise borehole drilling services using modern equipment, suitable for residential and commercial needs.

Water Tank & Pump Installation

We provide professional water tank and pump installation services designed to ensure reliable water storage, efficient water distribution, and consistent water pressure for residential, commercial, agricultural, and institutional clients.

Borehole Rehabilitation & Maintenance

We restore low-yield or non-functional boreholes through flushing, cleaning, and component replacement.

Irrigation Support Solutions

Solar-Powered Irrigation Pumping

We supply and install solar-powered pumping systems that provide reliable water delivery for irrigation purposes. These systems are ideal for farms seeking sustainable and cost-effective water pumping solutions.

Water Transfer Systems

We design and install water transfer systems used to move water efficiently from boreholes, rivers, dams, or storage tanks to households, agricultural fields and distribution points.

Basic Drip Irrigation Support

We provide support for small to medium-scale drip irrigation systems aimed at improving water efficiency and crop management.

Farm & Mine Water Distribution Infrastructure

We install farm and mining water distribution infrastructure including piping networks, storage tanks, and pressure support systems that help ensure consistent water supply across agricultural and mining operations.
